As a fact the character of the late Dowager

standard mysteries of history, as incapable

of solution as her own birth and abstraction.

Wisely the present REGENT supported by his

of impossibility; so the Edict lately published

the growing intention of abolishing by de-

THE amnesty proclamation issued by the PRINCE REGENT on behalt of the EMPEROR cannot be complained of as not going far enough in the way of mercy, and is studiously worded so as to give no offence to any while pardoning all. In some respects, as when restoring all forfeited honours, it goes further than sovereigns who have felt themselves personally aggrieved are wont, and clearly is intended to show to the world thoroughly the REGENT means to identify himself with the aspirations of his brother when the career of the latter was cut short by the Palace coup d'état of September 1898 If such be the real foundation of the Amnesty it is curious to observe how ingeniously it has been issued as an accompaniment to the turther bonorific titles to be conferred on the late EMPRESS DOWAGER for her virtues and talents, as well as for what she did tor the Empire during the half century in which she held with a tight grip the seins ment by proxy, and the neglect of the certainly rare in the annals of the sea. As of government. Leaving out of consideration the crimes of her administration, which cannot be blinked nor palliated, there no doubt that the late EMPRESS REGENT was one of those mirtals in whom the art of government is inborn, and not acquired by any process of education or afterdevelopment. What also did towards rais ng | public admiration the record of disting-

the position of China was instinctive, and in uished deeds was one tending to elevate the TELEGRAMS. The Authorities have decluded the moral tone of the population; and the TELEGRAMS. His Highness will be accorded a suggestion of its revival indicates a desire hence it was that it was accompanied by many draw-backs, which equally curiously to return to more sympathetic measures in the relations of governors and governed. were instinctive rather than the outcome of

Altogether, if not abused, the amnesty marks an evident desire to conform to the wishes of the people at large; and accompaniel with the promises of granting to the nation at large very considerable powers of self-government, may mark a new era in the state. It is one of the best signs of the fitness of the Chinese as a people for wide extensions of the principle of self govern. | foreign trade on July 1st and 2nd ment that, although clearly deter- next. mined on the subject, they have refrained from agitation or haste. In these qualities must be looked upon as an evidence that the they have exhibited a marked contrast to new administration has made up its mind to the other nations which have of late had break entirely with the past, and start a similar aspirations; Russia, Turkey or, new regime. There is on the one hand no worst of all, Persia. In one respect the doubt that many of the officials who had situation in China is entirely different from incurred the special enmity of the late the others. Neither side looks upon the RECENT richly deserved their punishment; changes as a gift; it has, on the contrary but on the other hand there is equally no come about from perfectly natural causes, doubt that many who had incurred her most largely financial. The authorities in Peking have had it prominently brought before them that the system of provincial adminisofficials who had simply fellen foul of some tration fails to bring to the central government any fair share of the local revenues, ascertaining what can be done to was the difficulty that faced the administrayet year by year the central Government is being further saddled with perfectly past; it was better, evidently thought legitimate expenses which have to be the pres nt advisers, that the door should met. The late regency had a method of be opened too wide than that any worits own in dealing with this problem, that thy official, whose only fault had been that of unlimited bribery and corruption, which he did not fall in with one or other of the was bringing the whole system into dispeculiar idiosyncracies of the late REGENT, repute, and must have ended in the subvershould merely for that reason be excluded sion of the Empire. The late Emperor, and for ever from the path of preferment. Not his brother, the present Regent early saw | that this could not last, and that the only | Indies. all those ministers of various rank who had way out of the difficulty was by substituting formed the entourage of the late EMPEROR for the provincial system one of popular before the coup d'état were incapables or control. Hence the movement has had the corrupt, nor were they prepared to act the solid ground of mutual benefit. The Chief Manager having read the notice convening the meeting,

The CHAIRMAN read the report and afterwards said: Gentlemen, Before proceeding to decision of the Chinese Authorities to | discuss the report and accounts I have to refer with deep regret to the great loss sustained by the Bank through the death of Sir Ewen Cameron. The high tribute paid to his services by the Chairman in 1905, when prolonged illness led to his enforced retirement from active duty, will not be forgotten. Although in failing health, he continued up to the day of his death to take the keenest interest in all that concerned the Bank and as a member of the London Consulting Committee was ever ready The sitting accommodation at the Alexandra to give to the management the benefit of his Cinematograph in Zetland Street was consider- ripe judgment and varied experience of men and ably taxed on Saturday night, and the large affairs. Chinese New Year fell on January 22nd, and its near approach, when money is always in special put to the Chinese Delegation at the last demand, accounts for the increase of some \$35 lacs in the note circulation. Deposits show the large increase of about \$43 millions. Of this increase gold deposits account for nearly \$31 millions, and although the lower rate of exchange on the 31st December last is responsible for a great amount expressed in dollars, still in sterling the increase is £2,400,000, which being mainly due to the proceeds of recently issued public loans, that have not yet been drawn from our London Office, can only be considered as temporary. In the increase of \$12 millions in the silver deposits may be seen a reflection of restricted trade, as a great proportion of such increase no doubt represents accumulation of capital waiting for a trade revival. You will readily understand that some difficulty was experienced in finding remunerative employment during the half year for this large increase in the amount of money entrusted to the Bank's keeping. Bills payable show an increase of \$30 lacs. On the other side, the amount of dollars deposited with the Hongkong Government is raised from \$10,000,000 to \$13,000,000. Cash and bullion in hand and in transit, are higher From the Home papers now to hand giving by about \$48 lacs. They appear satisfactory, - ominently so, and think we are to be congratulated on the very excellent results of the past half-year's working which our Directors have to-day presented If this be the result of a half year of dull and restricted trade, what indeed may be expected when the tide of prosperity again flows in the Far East! (Applause.) A brief reference was made by the Chairman to changes which have taken place in Peking during the past few months,-changes which, as the Chairman remarked, are of great moment. The disappearance of that commanding personality, the great Empress Downger, from the autocratic position which she had held for such a long period,—the death of the Emperor Kwang-Hsu, and the accession to the throne of an Infant, - are events, indeed, which for good or ill must affect the connected. While writing on the subject of luck, I should mention the experience of a local broker. The inadequacy of magisterial sentences crops up again. Last week Mr. Wood sent a man who returned from banishment to six weeks' imprisonment, while Mr. Kemp imposed a sentence of six months' imprisonment for a like offence. The comparison suggests that the former gentleman either regards the offence as less serious than the other or else he holds different ideas on the subject of punishment. Perhaps we might do worse than give some consideration to the Spanish system which still I have very great pleasure in seconding the obtains in the Philippines of codifying punishments. It makes impossible such anomalies as those recorded. Each offence has a stated pauishment.

> We can quite understand the tired feeling which now prevails in Manila The strenuous days of the carnival, with its prolonged joys, are over, and its citizens are realising that twentyfour hours per diem of enjoyment is too much even for the American constitution.

Those who patronised "A Country Girl" recall the smile which followed Nan's statement that she would be engaged at night counting beans,—counting how many made five, as she subsequently explained. But even Nan would be nonplussed had she been confronted by the mathematician who in demonstrating to his class theuse of the slide scale said: "We will now multiply two by two." He gravely announced the result as "3.9, which for practical purposes we may take to be four." Probably he knew how many beans made five.

I don't know whether it will popularise whisky or popularise suicide, but I could not help being struck by the news which I read in a home paper the other day that a domestic servant had committed suicide by drinking a pint of whisky, by several lengths from Shaun Aboo.

LEAGUE CRICKET

. HONGKONG "B" V. CIVIL SERVICE. This match took place on the Civil Service ground on Saturday afternoon and resulted in a win for the home team by 2 wickets and 19 runs. This is the first time the "B" team have been defeated. They were at a great disadvantage owing to the rough outfield and the peculiarities of the pitch which probably accounted for their defeat. There were a few spectators but the majority were at tracted by either the racing or football. Handock won the toss and took the field. Phelips and Hutchison going to the wickets. Hancock sent down the first over from which 3 singles were scored, both batsmen playing careful cricket. Phelips had some injury to his leg and had a sub-running between the wickets. Pearce bowled at the opposite end. Hutchison scored a boundary and followed with a single. Hancock's next over resulted in a couple with a difficult chance in the slips by Hutchison, who placed the next nicely past third man for 3. He then drove Pearce for 4 and 3 Phelips being content together half a century before being run out. to play careful cricket. Hancock beat the batsman several times but the balls rose too high | Scores follow :-to do any damage. Pearce in the next over caught and bowled Hutchison. 26-1-21. Reed relieved and scored immediately by a hard drive for 2 past the bowler. Next.over Phelips gave a chance and scored 4 by an overthrow. In the next Reed lifted Pearce for 4 and 2 but was caught next by Hancock in the slips. 40-2-9. Biden relieved and both batsmen played very carefully being beaten several times by Hancock's deliveries which, however, rose too high to take

the bails. Runs came slowly at this stage. Sharpin relieved Pearce with the ball, and secured Phelip's wicket, the batsman putting up an easy catch to third man. 59-3-13. Sutherland succeeded and played out the over. Clarton took up the trundling at the other end. Biden sent his first delivery to the boundary. Sutherland did likewise, and later essayed a run from a hit to the on. Biden hesitated and was run out.-66-4-20. Raven partnered Sutherland, who started hitting freely and scored several boundaries. He returned a hot one to Claxton who dropped it. scored off the two overs, Sharpin's 10 and Claxton's 14. Hancock relieved the latter and runs came slowly, Raven shortly afterwards being bowled by a shooter of Hancock's.—69—5—8. Witchell relieved and played out a maiden over. Sutherland gave a chance to third man who waited for it, but dropped an easy catch. The batsman took advantage of the and lifted Hancock over the two bringing up the century on the board. Witchell was shortly afterwards bowled by Pearce. 106-6-0. Ellis went out next and out nicely for 2 Sutherland lifted another 6, followed with 3, and Ellis lost his bails.—116—7—2. McEwen was his successor and played out the over. Sutherland and McEwen both went in for vigorous hitting, boundaries coming in quick succession, while chances were given all over the field. McEwen finally lifted one to the edge of the football ground and was caught by Claxton after playing a useful innings, the part nership registering 75.—183—8—26. relieved and with Sutherland carried the score to 195 when the inning was declared. Sutherland being 88 not out. One would hardly be justified in calling his innings a faultless one, but it is the sort of cricket that wins matches in the league competition, and was probably responsible for the Civil Service win on Saturday. After a short tea interval Hancock and Pearce faced the trundling of Bird and Brett. Bird's over was responsible for 2 singles, Brett was sent over the trees for 6 and 4, after which he appeared to get his length. Hancock and Pearce both scored off Bird. Hancock sent two difficult chances to mid-off in succession but was missed both times. Bird was treated very carefully. Next over Hancock sent first delivery to boundary, and in attempting a drive to the off later he was caught at cover point.—27—1—11. Daniel relieved and pulled to on for a single. Pearce tried to drive to leg but skied one into Phelip's safe hands.— 28-2-16. H. Hancock took the bat and played out the over. Next over was responsible for 3. Facing Bird egain, Hancock lifted one for 4, after which he was bowled. 36--3-5. laxton, who came next, appeared uncomfortable to Bird's deliveries. FOOTBALL.

THE SHIELD COMPETITION. H.K.F.C. V. "KING ALFRED".

The pointless draw played between these teams on the previous Saturday drew many spectators to the Valley last week end in anticipation of a good game, and they were not disappointed. The ('lub lost to the sailors by one goal, scored in the declining stages of the game. Shortly after play started the civilian team's score stood

at two goals against the King Alfred's nil, and appearances were all in favour of the Club for a win. But after the first half bad luck dogged their steps, and the quintette had also to contend against one of the smartest goalkeepers in the Colony. The teams lined up as follows:-H. K. F. C, : Hickling ; Hamilton and Aucott;

Gregory, Barlow and Linton; Williams, Weston, Brown, Turner and Mead. King Alfred: Tugwell; Carlisle and Lantern: Richardson, Hall and King; Evans, McLean,

Fleming, Lee and Hobbs. The Club opened play and while the game was quite young the whistle called the players to a halt as one of the civilians had come to grief. He was soon on his feet again, however, and the Club forced the sailors to defend. Williams took a pass and put in an excellent shot which was equally well saved by Tugwell. With an irresistible dash the civilian quintette continued to press on the sailors' stronghhold and at last their efforts were rewarded, Mead sending in a stinger which baffled the enstedian. The re-start saw the seamen still on the defensive and unable to stem the tide of the Club rushes, Tugwell in goal having an exceptionally trying time and displaying marked ability as a keeper. An attempt by Brown was well turned, but another of Mead's lightning shots which followed found a resting place in the net. At this stage appearances were all in favour of the Club for a win. But the men of the King Alfred were just warming to the work, and after the Club had secured a few unproductive corners the left wing of the sailor quintette broke away, and defeated the Club backs. Hobbs centred nicely challenged in the straight by Tamar, who won his stumps.—36—4—4 Shenton filled the vacancy and scored a couple. Bird appeared to his usual form, and should have saved at least one of the three goals recorded by the sailors. The re-start, saw the struggle continued before the Club stronghold, and Aucott and Hamilton working like trojans. Lee took a long shot at goal when the leather was footed out, and Hickling failed to clear. Play travelled from one end of the field to the other during the remainder of the half, the defence on each side having anxious moments, and smart and clover work being the order of the day. The half closed with the score unchanged, both teams having registered two goals.

the selective action of radium on the tissues The second moiety opened with the sailors on on embryonic tissue? What would be the effect guard, the lengthy pressure by the Club termiof introducing it into the substance of a growth nating when a penalty was given against one of the halves. The King Alfred quintette took in tubes made of material that was permeable to its rays? What were the effects, local and charge of the leather and carried it into Club territory. A sharp struggle followed, but general, of radioactive water? In I aris such Hamilton succeeded in clearing and the Club water was sold as an application for indolent resumed the attack. Williams sent in a sharp wounds; and at Josehimstal a large sp. was low shot which struck the upright and went being erected to enable the public to drink it. behind. A gain the quintette became aggressive In conclusion the lecturer repeated his warning and a likely goal was in view for Mead when he that extreme caution must be exercised in was ruled off-side. The Club were now beaten speaking of what radium was going to do, else-

back on to their own stronghold and a period of sharp exchange work succeeded, being ultimately brought to an end by the irresist. ible rush of the sailors. Fleming took the upright and bounced back, but this time Fleming headed it between the posts and recorded the winning goal smidst wild excitement. There was now a long detention of play owing to one of the King Alfred men taking a fit. Medical aid was sought and two doctors appeared on the scene and had the seaming removed from the field. Then play was resumed, and although the Club strove hard to get an equalising goal (which they might have accomplished with an ordinary keeper in Tugwell's place) the whistle sounded with the score unchanged.

Final: King Alfred, 3; H.K.F.C., 2. Y M.C.A. V. H.M 8 "KENT."

The belated meeting of these clubs in the second round of the Shield Competition took place on the Club ground on the Happy Valley, and was watched by a fair number of spectators. The "Saints" suffered an unexpected reverse. True they were not at their strongest but it was thought they would give a better account of themselves than they did. It has to be remembered however that fortune did not deal kindly with them. They started two men short and to make matters worse Storrie met with an accident which involved his leaving the field. It is thought he broke a bone in his instep but medical opinion will disclose the nature of the injury when the swelling subsides. In these circumstances the tars had naturally the better of the play and won their way into the semi-final by three goals

SIR FREDERICK TREVES ON R DIUM

At the London Hospital Sir Frederick Treves gave a lecture on "Radium in Eurgery last month." Sir Frederick Treves said that to him as to

many others it seemed that there were possibilities of a future for radium in the realm of surgical thereapeutics. But he ntfered a warning against expecting too much from this as from other new remedies. The X-rays an high-frequency currents had hardly fulfilled the hopes that were raised by them at their introduction; and so to the Finsen light, where was never in the history of hospitals a more daring innovation than its introduction at the London, Hosand while the good it had inexpressible, yet he supposed we were now not far off the limit of the good which it could effect. Ent it might be said that radium would cure every form of neavus, in the widest sense of the word-the port-wine stain, the pigmented mole, and the hairy mole. In one case of angioma on the eyelid, the size of a plum, which had been twice excised and twice treated with the actual cautery, a cure was effected without pain or discomfort. Radium had cured another case of angioma extending over nearly all one side of the face, and a fibrous angioma, the size of a hen's egg, in the substance of the arm of a child, was dispersed by it in four weeks. Applied on varnished silk it almost immediately removed the itching of eczema, which did not return. It would care redent ulcers which had existed for years, and in which the Finsen light and the X-rays had been tried without permanent success. Again, it had cured epitheliomata of the tongue, lip, cheek, &c., and the results were apparently permenent. The secret of its successful use lay in the realization of the fact that extent of surface was requireda little radium spread over a wide area was more powerful than a solid bead composed of it. In Paris, Dr. Domenici used redium of quarter strength spread on plates of varying sizes and forms, and in this way he was able to gauge the power employed to a nicety. A perper pre-cription had to be drawn up for each patient. Besides the rays, radium gave off an emanation, and proand Fleming found no difficulty in defeating. He had been informed that after a solution of deposit from the emanation had been injected into a mouse in which abdominal cancer had been artificially produced the cancer vanished. In a one-time patient of his own each subcutaneous injection of emanation solution produced a scar and a skin-pigmentation such as he had never before seen in all his surgical experience. s to the lines that future investigation must follow in regard to the therapeutic action of radium, it was essential to

ascertain the action both of the ray and of the

emanation on bacteria and their products. Then

must be investigated. Had it any selective power

disappointment was sure to result.

At the same time ber bow shot skyward, only to be drawn down as the sea poured into every compartment. Then she settled, and in a few minutes her topmast and flag were all that remained visible.

Beats were lowered from the Furnessia and the two revenue cutters, which were towing the doomed liner. In a jiffy the men, of the Republic's crew scrambled into the lifeboats. These men did not show cowardice. Had they done so, the smaller boats would have been swamped. They came slowly, and each man seemed to leaving, no mad fight for a place of vantage. When the lifeboats were filled they were rowed quickly back to the cutters, only to return to the side of the fast-sinking Republic.

Captain Sealby and his mate and a few other seamen were left on board. Captain Sealby was told that his ship was sinking, but he refused to leave, and so did his mate. A GOOD START IN LIFE.

Mothers should early realize how essential good health is for the success of their child in after life. A badly nourished baby generally means an undersized child, wanting in stamina and vigour. If unable to nurse your baby, you must give the substitute that most closely resembles human milk. No farinaceous or starchy food or unmodified cow's milk is permissible to a child under 6 or 7 months of age. The "Allenburys" Milk Foods are so prepared as to remove the difference between cow's milk and human milk, and they are as easy of digestion as the natural food of the child.

The "Allenburys" Foods are alike suitable for the delicate and robust, and, when used as directed, form the best means of rearing a child by hand. The No. 1 Milk Food may be given alternately with the mother's milk without fear of upsetting the child on causing digestive disturbance. The dreaded process of weaning is thus made easy and comfortable both to the mother and child.
